To whom it may concern,

My company, M & E Painting, is a local indoor/outdoor painting company. In the past, we advertised our services almost exclusively offline. What Internet advertising we DID do, did not work. For me, the Internet leads were expensive and forced me to compete with other companies to get their business.

That is when I engaged Own Vision to improve my online advertising.

When we got started, I had high hopes, and little expectation. But, I quickly realized the immense value of what Own Vision does. They set me up directly on Google and started sending profitable, serious customers my way almost immediately. Own Vision took my leads out of the competitive environment and landed them directly on my own web site, with a custom written response form. When a lead comes through this channel, they are serious, educated about my services, and often ready to pull out the checkbook.

Internet advertising is now one of my top priorities, and thanks to the work of Own vision, I can say, one of my most profitable advertising sources. I recommend the services of Own Vision without hesitation. They are easy to work with, responsive to my needs, and most of all -- they make me money.

Sincerely,

Matt Shoup
